

EXTERNAL EXPERTISE

Our External Experts are brought on to develop our programmes through creating modules, micro-modules and lessons. We engage with external experts to bring contemporary and real-life knowledge to Transition Year resources. By working with these experts, we can ensure that our resources include future-focused learning and innovative ideas to expose learners to world-leading experts and their work in a digestible and accessible format. Learners are encouraged to critically think about and engage with knowledge and content in a learner-led and project-based manner.

TARA BATH MOONEY

SMARTlab Sligo
